Last and Outsole

Last Development — Standard & Barefoot Geometry

Image note: Left & center = regular court/sneaker lasts; right = **barefoot last** with anatomic wide toe box.

- **Custom last engineering** for vulcanized and cold-cement footwear; men's/women's/kids and unisex grade runs (EU 24–46 typical).
- **Barefoot option:** anatomic **wide toe box** to allow natural toe splay; low profile forefoot, optional low/zero heel-to-toe drop; rounded heel and flexible forepart geometry.
- **Standard options:** regular/wide/extra-wide widths; ball-girth, instep and heel width tuned per fit brief.
- **Fast iteration:** sample pairs for fit trials with measured adjustments (ball girth, toe allowance, vamp height, heel grip) before full grading.
- **Compatibility** with your outsoles/foxing: we supply 2D bottom outlines and last seat files to match tooling.

Outsole Development

- **From sketch to mold:** We design tread and sidewall, build steel/aluminum tooling, and match your last and foxing profile
- **Tread library:** herringbone, waffle, diamond, ripple; cup-lock blocks; forefoot flex grooves; toe/heel bumper wraps
- **Sidewall options:** smooth, ribbed, diamond, block-mold; supports UV printing, emboss/deboss logos, and clear/translucent wraps
- **Compounds & looks:** classic gum, solid colours, smoke/clear translucent; recycled-content and lightweight blends available
- **Performance tuning:** Shore A 55–70; slip/abrasion balanced to brief; weight and flexibility optimised via cavity design
